Dear Parent / Carer

I would like to take this opportunity to reassure parents and carers regarding the current safety measures in place at the Academy.

The Academy has actioned a number of measures to keep students and staff safe whilst maintaining an education for all students. These measures include hand sanitiser in every classroom, additional hand washing facilities across the site, additional cleaning of rooms and communal areas, deep cleaning programme, staggered start and finish times, amended layout of classrooms, creation of student bubbles so that year groups are kept separate, including whilst using Break, Lunch and toilet facilities. Students and staff are wearing face coverings in corridors and other communal spaces.

In addition, since September, there are more staff on duty, including at the end of the day. We consistently remind students to social distance as much as possible, especially when entering and exiting the Academy site.

When a member of the Academy community tests positive for Covid-19 contact is made with Public Health England. Each individual case is discussed, including the timeline and potential close contacts. In line with Public Health England advice, we then take all required actions to safeguard the wellbeing of the Academy community.

Yours faithfully

Mrs C L Yates
Principal
